# MODIS Active Fire Detections - July 30, 2016

Alaska Geographic Area

DEVIATION PEAK
MAUNELUK RIVER
MAUNELUK RIVER 2
REED RIVER
WARREN CREEK
INFAKUK LAKE
METTENBERG CREEK
HOGATZA RIVER
HIGH CREEK
FIRST CREEK
SOUTH FORK HUSLIA RIVER
DUBBI FLATS
HONHOSA RIVER
DUBBI RIVER
YUKI RIVER
GALATEA CREEK
CAMP CREEK
FOLGER CREEK
CRATER MOUNTAIN
KUYUKUTUK RIVER
REINDEER RIVER
BEAR CREEK
SOUTH FORK GEORGE RIVER
DEVILS ELBOW
OWHAT RIVER 2
ISRATHOKAK CREEK
PIKMIKTAEIK RIVER
BOGUS CREEK
DOESTOCK CREEK
HOHOLITNA RIVER
CHILIKADROTNA RIVER
Nome
Fairbanks
Anchorage
MCHUGH
Juneau
Sitka
Ketchikan
Wrangell
Petersburg

## LEGEND

*Map Current As Of July 30, 2016 - 1700 MDT*

- Fire Detection (Last 6 hours)
- Fire Detection (Last 12 hours)
- Fire Detection (Since January 1st)
- VISTA Incident Name
- Interstate Highways
- State/U. S. Highways

Elevation

| Meters | Feet |
|---|---|
| 3,500 & Above | 12,000 & Above |
| 3,000 | 11,000 |
| 2,500 | 10,000 |
| 2,000 | 9,000 |
| 1,500 | 8,000 |
| 1,000 | 7,000 |
| 500 | 6,000 |

Albers Equal-Area Projection

This map, compiled by the USDA Forest Service Active Fire Mapping Program in cooperation with interagency and institution partners, displays the location and relative detection time of all types of all observable fires and other thermal activity through the specified date/time. Fire activity is identified from high temporal, synoptic view, multispectral observations collected by the Moderate Resolution Imaging Spectroradiometer (MODIS). MODIS is currently onboard the polar-orbiting NASA EOS satellite platforms Terra and Aqua. Each MODIS instrument provides multiple thermal observations of the Earth in the mid to high latitudes on a daily basis.

The Active Fire Mapping Program utilizes near real-time direct readout MODIS imagery from both Terra and Aqua collected by the Active Fire Mapping Program and interagency/institution partners, and MODIS imagery and data products provided by the NASA MODIS Rapid Response System. Detectable fire activity at the time of satellite overpass are identified and characterized at 1km spatial resolution using the latest version of the MODIS Active Fire Product (MOD14/MYD14) algorithm. A detected fire does not necessarily mean that the entire area represented by the 1km pixel is on fire. A detection may be the result of intense fire activity covering a small fraction of the pixel area or fire activity occurring over a broader area. Fire detection omission/commission errors may occur due to input data anomalies, limited satellite observation conditions, and/or potential algorithm limitations.

Use of this map for other than its intended purpose may yield inaccurate or misleading results. The Forest Service attempts to use the most current and complete geospatial data available, and reserves the right to correct, update or modify geospatial inputs to this map without notification. For additional information, please contact the Forest Service Remote Sensing Applications Center (RSAC) at 801-975-3750.
